

The Mediflex 'Draughn' Lap Rack

INSTRUMENT HOLDING & POSITIONING SYSTEM

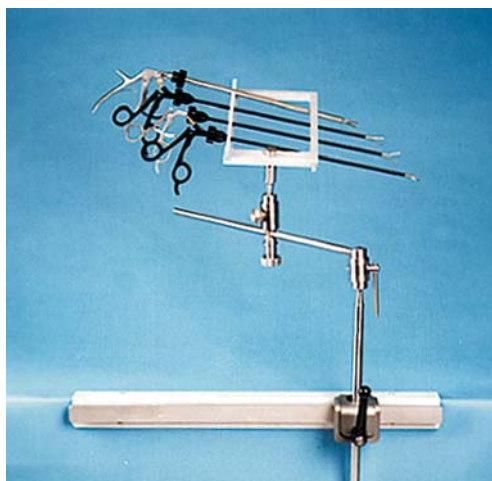

System 69074

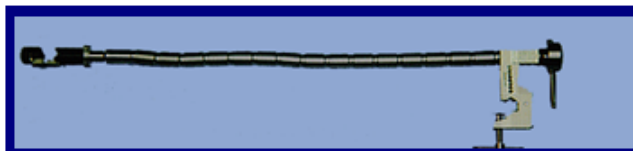

The Lap Rack was designed by a laparoscopic surgeon to hold up to 8 laparoscopic instruments including graspers, shears, dissecting instruments, clip applicators and suction/irrigation devices. It eliminates awkward hand to hand instrument exchanges and keeps instruments in the sterile field, not on the floor.

Product Code	Qty	Lap Rack System
