To Whom It May Concern:

Mediflex declares that to the best of its knowledge, all of the information concerning the material safety and the sterilization process of the Model number 74000 Pre-surgical scope warmer is true.

The model number 74000 is comprised of sodium acetate, a 304 series stainless steel disk and a P.V.C. outer cover.

The product is sterilized in accordance with Test Standard USP27.

The information contained in the MSDS is obtained from external laboratories, and the originals are available upon request.

Sincerely,
Michael Caruso II
Sr. Quality Engineer
Mediflex
